

Mada Software & AI

MadaAudit

Professional PC Audit Software

Quick Start Guide · Version 2.0.0

■ Hardware Audit

■ Battery Test

■ HDD / SSD

■ IPP Print

1 — What is MadaAudit?

MadaAudit is a **portable, USB-based PC diagnostic tool** for IT technicians and service centers. It runs entirely from a USB flash drive — no installation required on the customer's computer. Results are automatically synced to Google Sheets and printed via network (IPP) or local printers.

■ Portable	Runs from USB — leaves zero footprint on the PC
■ Encrypted License	Bound to the USB serial number (dongle)
■ Cloud Sync	Audit results saved to Google Sheets automatically
■ Network Printing	Prints via IPP to any network printer
■ Multi-device	One license covers multiple PCs (per-plan quota)

2 — System Requirements

Component	Minimum	Notes
OS	Windows 10 / 11	64-bit recommended
USB Port	USB 2.0 or higher	Required for dongle binding
RAM	2 GB	4 GB recommended
Internet	Optional	Required for Google Sheets sync only
Printer	Optional	IPP network or Windows local printer

3 — First Run

- Step 1

Copy MadaAudit_v2.0.0.zip to your USB flash drive and extract it.
- Step 2

Plug the USB drive into the technician's computer.
- Step 3

Double-click MadaAudit.exe — no installation needed.
- Step 4

The app starts and reads the license.key from the USB root automatically.
- Step 5

If no license is found, the Activation screen appears (see Section 4).

■ Always run MadaAudit from the same USB drive it was activated on. Moving it to another USB will require re-activation.

4 — License Activation

The license is bound to the **USB physical serial number**. Each activation is registered in the cloud automatically.

1. Open the app → click the **Admin Panel** button.
2. Go to the **License** tab.
3. Paste your activation code in the field provided.
4. Click **Activate** — the app validates with the Mada server.
5. Once confirmed, click **Save Key to Flash Drive**.
6. A **license.key** file is written to the USB root.
7. From now on, the license loads automatically on every run.

■ *If your license expires, the activation screen reappears. Contact info@madanl.com to renew.*

5 — Running an Audit

5.1 Starting a New Test

1. From the main screen, enter the **Customer Name** and **PC Serial Number**.
2. Click **Start Audit** — the app begins collecting hardware data.
3. Wait for all tests to complete (progress shown on screen).
4. Review results — each component shows a **Pass / Warning / Fail** status.
5. Click **Print Report** to send the report to the configured printer.

5.2 What the Audit Checks

Test	What It Checks	Tool Used
CPU	Model, cores, temperature	WMI / WMIC
RAM	Total, speed, slots used	WMI
HDD / SSD	Health, SMART status, capacity	DiskInfo (bundled)
Battery	Capacity, wear level, cycles	BatteryInfoView (bundled)
GPU	Model, VRAM	WMI
OS	Windows version, activation	WMI
Network	Adapters, MAC addresses	WMI

■ *HDD and Battery tools are bundled inside the EXE — no separate installation needed.*

6 — License Plans

Plan	Validity	USB Devices	Device Audits
Trial	1 day	1	5
Monthly	30 days	1	700
Pro	6 months	2	3,500
Ultra	1 year	3	10,000
Gold	Custom	Unlimited	Unlimited

Feature	Trial	Monthly	Pro	Ultra	Gold
All diagnostic tasks	✓	✓	✓	✓	✓
Label printing	✓	✓	✓	✓	✓

Google Sheets sync	✓	✓	✓	✓	✓
Admin panel	✗	✓	✓	✓	✓
Multi-user roles (4)	✗	✓	✓	✓	✓
Priority support	✗	✗	✗	✗	✓
AI Support (early)	✗	✗	✗	✗	✓

■ *Same PC re-audited multiple times counts as **one audit** — only new PC serial numbers deduct from your quota.*

7 — Printing Reports

Network (IPP) Printer:

- The app auto-scans your local network for IPP printers (port 631).
- Detected printers appear in the printer dropdown automatically.
- Select the printer and click Print Report.

Local Windows Printer:

- If no IPP printer is found, the default Windows printer is used.

■■ *Make sure the PC running MadaAudit is on the same network as the printer.*

8 — Google Sheets Sync

MadaAudit syncs every audit result to a Google Sheets spreadsheet you control. Follow the steps below **once** to connect your sheet.

Step	Action
1	Create a new Google Sheet and copy its URL from the browser address bar.
2	Open MadaAudit → Admin Panel → Settings tab.
3	Paste the Sheet ID into the <i>Audit Sheet ID</i> field and click Save . The Sheet ID is the long code between <i>/d/</i> and <i>/edit</i> in the URL.
4	In Google Sheets click Share and add this service account as Editor : connect@mada-audit-app.iam.gserviceaccount.com

■■ Important Rules

- Do **NOT** rename or delete the *Audit Results* or *Audit History* tabs.
- Do **NOT** modify Row 1 (column headers) on any tab.

■ *Internet connection is required only during the sync step. The audit itself works fully offline.*

9 — Troubleshooting

Problem	Solution
License not found on startup	Ensure license.key is in the USB root folder. Re-activate if missing.
"Invalid license" error	The USB may have changed. Contact support to re-bind the license.
No printers detected	Check network connection. Manually select a Windows printer from the dropdown.
Google Sheets sync fails	Check internet connection. The audit is saved locally and will retry on next run.
Battery test shows no data	Desktop PCs with no battery will show "N/A" — this is expected behaviour.
App does not open	Run as Administrator. Make sure Windows Defender is not blocking the EXE.

10 — Contact & Support

Legal Notice — Licensing & Refund Policy

Non-Refundable Digital Product

All MadaAudit license keys and subscription plans constitute **digital goods** delivered electronically upon purchase. By completing your purchase and receiving a license activation code, you acknowledge and agree that:

- (i) The license key is a **non-tangible, irrevocable digital product** and is therefore **not eligible for refund, exchange, or chargeback** once issued and activated, in accordance with applicable digital goods regulations;
- (ii) Activation of the license constitutes full delivery and acceptance of the purchased product;
- (iii) Mada Software & AI expressly excludes the right of withdrawal for digital content supplied under a definite license term, as permitted under EU Directive 2011/83/EU Article 16(m) and equivalent consumer protection laws.

Customer Support Commitment

Notwithstanding the foregoing, Mada Software & AI is committed to providing **continuous, plan-level customer support** throughout the duration of your active subscription. Should you experience any technical issue, activation failure, or service disruption attributable to our platform, our support team will work to resolve the matter promptly — including, where warranted, issuing a replacement license key or extending your subscription period at our discretion.
